

Kindermann at ISE 2023, Hall/Booth 2V675

Kindermann KCLICK&SHOW with new features for Collaboration & Conferencing

Kindermann will present the new, free firmware update for its KCLICK&SHOW models K-FX and K-40 at ISE 2023. For the first time, two KCLICK&SHOW base units can be linked, allowing different content to be shown on two displays, ideal for hybrid meetings. A new MacOS BYOM client and optimizations in terms of Miracast transmission bring further added value.

KCLICK&SHOW Screen Link

The ultimate highlight of this release is without a doubt the new KCLICK&SHOW Screen Link function. This feature allows two KCLICK&SHOW base units to be linked. The advantages are that twice as many HDMI outputs and processing power are available and content can be output to two displays at the same time. The latter is ideal for applications that benefit from outputting different image content across two main displays. For example, different spreadsheets can be easily synchronized during presentations, and participants plus local content can be displayed simultaneously during web conferences. In educational applications, the lecturer's training material can be permanently displayed while the students' content is rotated through on the second display.

BYOM meets MacOS

Now even users of Apple MacBooks can enjoy the benefits of BYOM in hybrid meetings with KCLICK&SHOW K-FX featuring the new firmware update. Thanks to the MacOS BYOM client, UC equipment such as video soundbars and webcams can easily be hooked up wirelessly to the MacBook. All popular web conferencing applications are supported.

Optimized Miracast functions

Both KCLICK&SHOW K-FX and K-40 offer optimized wireless transmission via Miracast Standard and "Miracast-over-Infrastructure" with this update. In addition, the previously required USB WiFi adapter of the K-40 model becomes unnecessary under certain conditions.

The new firmware update is rounded off with further improvements and bug fixes. In addition to security-related aspects, the processing of webcam video and audio data is optimized, which ensures more reliable connections and higher quality in hybrid meetings.

The new firmware packages (version K3095 for KCLICK&SHOW K-X, version K1082 for KCLICK&SHOW K-40), as well as further information about the Kindermann KCLICK&SHOW product family can be found at: www.klickandshow.com/en/.

About Kindermann

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity.

The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the KCLICK&SHOW product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Würzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.

Supplemented by a broad product portfolio in distribution, Kindermann enjoys an excellent reputation as a full-range supplier for conference, presentation and media technology, digital signage and dedicated education solutions.

As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist dealers. Trade partners are supported with competent advice and individual project support - from planning to equipment and integration. Attractive special services round off the portfolio.
