

Yamaha is first certified Klick&Show Partner

Kindermann GmbH is establishing a worldwide certification programme for its universal BYOM & BYOD solution Klick&Show K-FX. The intention is to offer customers solutions for hybrid meetings, videoconferencing and collaboration that are perfectly matched to each other. To ensure this, the interaction of the products is extensively tested for compatibility both at Kindermann and their partners.

To kick off the programme, Kindermann presents its first official Klick&Show K-FX partner: Yamaha Music Europe GmbH. As a first step, the two new Video Collaboration Systems from Yamaha, CS-800 and CS-500, as well as the all-in-one ADECIA audio solutions for conferencing were certified for Klick&Show K-FX all across Europe.

Video Collaboration Systems even for open spaces

The Yamaha CS-500 and CS-800 use the latest AI technology to combine voice and video data, enabling precise, hybrid collaboration in real time. In doing so, Yamaha's newly developed SoundCap Eye™ technology localises the positions of participants, reduces distracting background noise and adjusts the volume. In addition to these features, the Yamaha CS-800 is an all-in-one Video Sound Bar that also offers an integrated 90 dBSPL (1 m) speaker, ensuring the best sound quality in the meeting space.

Professional Audio Solutions for best sound quality

Yamaha's Dante based ADECIA solution family can be used in three different variants - ceiling, wireless and tabletop solutions - and combines a whole range of microphones and speakers into a complete solution for the best audio quality in conference rooms. The RM-CR conference processor provides the best connectivity by automatically detecting microphones and speakers on the same network and adjusting the optimal sound settings regarding to the used room.

In combination with Klick&Show K-FX, these devices can be operated comfortably in the sense of BYOM (Bring Your Own Meeting). Thanks to USB-over-WiFi for conferencing, the devices can be connected to the Klick&Show K-FX via USB and

used wirelessly with the notebook. Four USB ports (1x Type-C, 3x Type-A) are available on the back of the Klick&Show K-FX base unit for this purpose. It supports the transmission of camera images in full HD resolution (1920x1080p) at 30 fps for excellent image quality in video conferences.

About Kindermann

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity.

The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the Klick&Show product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Wuerzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.

Supplemented by a broad product portfolio in distribution, Kindermann enjoys an excellent reputation as a full-range supplier for conference, presentation and media technology, digital signage and dedicated education solutions.

As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist dealers. Trade partners are supported with competent advice and individual project support - from planning to equipment and integration. Attractive special services round off the portfolio.
