

Ideal for Ultra-Wide Displays: The new Kindermann DisplayShift²

21:9 is the new display format for hybrid meetings. Kindermann has expanded its DisplayShift² series so that these ultra-wide displays can be conveniently adjusted manually in height. The new model offers a safe and sustainable solution for fast, smooth and stepless height adjustment of displays weighing from 85 kg to 108 kg.

Simple installation and innovative mechanics

The Kindermann DisplayShift² series impresses with its simple and time-saving installation. The new model is delivered largely pre-assembled and, at only 47 kg, has a low dead weight compared to other systems. For easy mounting of the display, it offers VESA mounts from 300 x 150 - 1,000 x 600. In addition, Kindermann has designed a unique spring-loaded mechanism that prevents the spring from stretching. Thus, no "readjustment" is necessary for years. This is confirmed by Kindermann's successful endurance tests with over 50,000 cycles. In addition, the entire DisplayShift² series has now received the TÜV GS certification.

Ergonomic and inclusive

The DisplayShift² offers users a smooth and stepless solution for quickly adjusting the height of interactive screens over a stroke path of approx. 690 mm. This enables an ergonomic working environment for people of all sizes and even wheelchair users can work comfortably at the display. Thus, the height adjustment is ideal for touch displays such as the Kindermann TD-30105-UW. With an aspect ratio of 21:9, the 105-inch interactive panel offers a lot of space for visualisations and thanks to 20 touch points as well as zero-gap technology, writing on the display feels very natural.

Flexible & future-proof

The new DisplayShift² is compatible with all common displays from 85 kg up to 108 kg. A display exchange is possible without any problems. Kindermann also offers suitable accessories for a wide range of requirements. Among other things, a floor stand is available that enables mounting on lightweight walls, as it diverts the weight downwards. The sturdy Kindermann Sprinter DS rolling stand is available for mobile use of the system. Furthermore, an optional handle, a notebook shelf and holders for soundbars provide additional user comfort.

About Kindermann

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity.

The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the KCLICK&SHOW product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Wuerzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.

Supplemented by a broad product portfolio in distribution, Kindermann enjoys an excellent reputation as a full-range supplier for conference, presentation and media technology, digital signage and dedicated education solutions.

As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist dealers. Trade partners are supported with competent advice and individual project support - from planning to equipment and integration. Attractive special services round off the portfolio.
