

Kindermann at ISE 2024, Hall/Booth 2S300

## **Kindermann assembles packages for new work environments**

Kindermann GmbH focusses on absolute simplicity. With the new Kindermann bundles, all-in-one complete solutions are now available that turn huddle spaces, meeting and conference rooms "out of the box" into smart conferencing and collaboration environments.

### **Bundles in general**

The brand new Kindermann bundles make it easy to transform rooms of different sizes into hybrid working environments. The all-round carefree packages include all products for the respective areas of application and requirements. The components are perfectly harmonised and tested for compatibility. Hardware and software were developed by Kindermann and are also partly produced in-house. A total of seven different combinations are available.

### **Huddle spaces**

A good example how smaller rooms (approx. 15 square metres/up to 6 people) can be turned into an interactive video conferencing environment is the Huddle<sup>65M</sup>. In this complete solution, all Kindermann's technology is mounted on a mobile stand: A 65" 4K IFP, a video soundbar and motorised height adjustment. The bundle includes the universal BYOM & BYOD solution Klick&Show K-FX, which connects notebooks wirelessly to the display and the video soundbar. All common UC platforms are supported. In addition, content can be shared and edited wirelessly, regardless of the operating system.

### **Meeting rooms**

The Meet75<sup>CCDS</sup> bundle has been configured for medium-sized rooms with approx. 30 square metres and 18 people. This system is intended for fixed installation, which is why the 75" IFP is supplied with the manually adjustable DisplayShift<sup>2</sup> Classic wall mount. The scope of delivery also includes the MultiSwitch 21 HDBT, a multi-format switcher for HDMI, USB-C incl. USB data signals consisting of a receiver and a transmitter unit. In combination with the elegant "CablePort frame slide" table connection panel, this solution offers the perfect conditions for hybrid meetings and digital collaboration. Notebooks are connected via USB-C or HDMI/USB and thus automatically connect to the display and the video soundbar. The devices are also chargeable via USB-C. Thanks to HDBaseT 3.0 technology, one CAT cable is all that

is needed to transmit audio and video signals, power supply, USB data and control signals.

### **Conference rooms**

Increasing room size (approx. 50 square metres/30 people) also raises the demands on display size. Therefore, the ProPresent<sup>86</sup> bundles include 86-inch touch displays. These all-in-one solutions include the DisplayShift<sup>2</sup> Classic wall mount with manual height adjustment of around 54 cm and the Klick&Show K-42 UC wireless presentation system for cable-free collaboration. Rooms of this size are also perfect for training courses, so Kindermann offers a version with wing boards.

#### **About Kindermann**

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity. The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the KCLICK&SHOW product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Wuerzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.

Supplemented by a broad product portfolio in distribution, Kindermann enjoys an excellent reputation as a full-range supplier for conference, presentation and media technology, digital signage and dedicated education solutions.

As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist dealers. Trade partners are supported with competent advice and individual project support - from planning to equipment and integration. Attractive special services round off the portfolio.
