Four new partners join the MAXHUB Partner Ecosystem

Seamless compatibility and increased productivity in conference rooms of all sizes - this is the motivation behind the MAXHUB Partner Ecosystem. The provider of integrated communication and display solutions is pleased to welcome four new, well-known partners: Nureva, Extron, Sennheiser and Inogeni are now part of the alliance.

Audiovisual brilliance from a single source

The MAXHUB-Nureva partnership stands for superior audiovisual conferencing systems that simplify setup, streamline administration and reduce costs. For example, the combination of the Nureva HDL200 soundbar and the MAXHUB V6 series touch display provides an ideal setup for small to medium-sized meeting rooms, while large conference rooms can benefit from the audio power of the Nureva HDL410 and the visual power of the MAXHUB 5K ultra-wide display. Every Nureva system is powered by the company's patented Microphone Mist™ technology, which fills rooms with virtual microphones so voices are picked up wherever participants move.

Scalable AV and room control with intuitive controls

The MAXHUB tabletop touch console and Extron control systems work together to provide one-touch control of entire rooms by automatically starting displays, adjusting lighting, and lowering blinds based on a defined scenario. The partnership provides scalable integration of Extron control systems, audio equipment, and signal switching into MAXHUB room solutions for Microsoft Teams Rooms, Zoom Rooms, and more. MAXHUB device drivers seamlessly integrate with the Extron platform.

Best intelligibility regardless of room size

When Sennheiser's high-quality, Teams-certified audio solutions are combined with MAXHUB's innovative display and UC solutions, productive meetings are guaranteed. The Sennheiser TeamConnect Ceiling Medium and TeamConnect Ceiling 2 are the perfect complement to the MAXHUB kits for Microsoft Teams rooms. These ceiling-mounted microphones ensure perfect intelligibility in areas of up to 80 m² without taking up space on the table. For more than 75 years, Sennheiser has been synonymous with exceptional sound experiences for seamless collaboration in workspaces, auditoriums, conference rooms and hybrid meeting environments.

BYOD/BYOM made easy

The versatility of Microsoft Teams Rooms (MTR) is effortlessly enhanced through the collaboration of MAXHUB and INOGENI. These technologies work synergistically to provide a seamless video conferencing experience that keeps everyone happy and productive. MAXHUB's Microsoft Teams
