

**Kindermann GmbH seals cooperation with Heuff Sound & Vision B.V. in the Netherlands**

Kindermann, German supplier and manufacturer of conference and media technology, has entered into a partnership with the renowned AV distributor Heuff in the Netherlands. This is another important step in Kindermann's international expansion strategy.

Heuff is an established AV distributor that offers its customers in the Benelux real added value. On the one hand, the company selects its suppliers according to strict quality criteria and is the exclusive importer of several high-quality audiovisual brands. On the other hand, resellers receive expert advice and comprehensive support for their projects.

Kindermann has consistently expanded and developed its product portfolio. Today, the German company, which has its own production facilities in Bavaria, offers a wide range of professional solutions, from table connection panels to brackets and interactive flat panels. The Klick&Show wireless collaboration system is particularly popular. The K-FX Plus model, the most powerful base unit and 4K transmitter to date, has recently been launched in a new design. Universal use and connectivity, intuitive operation and innovative features make Klick&Show K-FX Plus a useful all-round tool for meetings.

“We are delighted to be working with Kindermann. We were immediately impressed by the quality of the products and the ease of installation and use. This is an ideal addition to our portfolio and opens new opportunities for our resellers,” says Willem Bakker of Heuff.

“Expansion in the Benelux is very important to us. We are therefore very proud to have gained a strong and competent distribution partner in Heuff,” says Gerhard Zawatzki, Head of Sales International, Kindermann GmbH.

**About Kindermann**

Kindermann, founded in 1861, is the oldest company in the Pro AV industry and is today one of the leading suppliers acting as manufacturer and distributor. Kindermann has always managed in an intelligent way not only to adapt to new market conditions, but also to advance technologies.

Kindermann stands for conferencing, collaboration and connectivity.

The world of work and education has changed massively. Collaboration in hybrid teams and digital teaching place new demands on technical equipment. This is exactly where Kindermann comes in with its smart solutions. Smart stands for intelligent, networked, intuitively operable, but also for sophisticated design.

The company has expanded its own portfolio and is thus represented internationally. For example, the Klick&Show product family is also very popular in many European countries. It shows how easily wireless collaboration and conferencing can work. The triumphant success of Kindermann touch displays is not only based on the trendsetting technology but is above all due to the intuitive user interface developed in-house. At the Eibelstadt site near Wuerzburg, series products such as table connection panels, brackets, ceiling lifts and media furniture are developed and manufactured. In addition, exclusive customer requests can be quickly implemented here.
